

Feedback received (till 28/11/2016)

- SE, MT, LV, PL, FR, DE, NL, CZ, ES
- Publishing reporting data under INSPIRE and reporting under the environmental acquis is double work. COM should avoid this.
- Action should be aligned and synchronized with work on eReporting concept document and take into account feedback from reporting communities.
- Support to tackle this in the context of Eionet.
- List
 - **Clean up / improve list (doubles, terminology, clarify)**
 - **Further detail the list as deep as possible for better implementation guidance.**
 - **Some comments have already been addressed in the current version of the list.**

Objectives

- communicate ENV information priorities and expectations to MS by clearly identifying the spatial data sets relevant for environmental reporting;
- provide guidance on consistent mapping of reporting obligations and supporting data to INSPIRE spatial objects for the development of pan-European data sets;
- identify reporting redundancies and explore opportunities for streamlining;
- improve the timeliness and the quality of reported data
- to provide a governance instrument to:
 - **incrementally build comparable INSPIRE maturity across MS for all INSPIRE components (metadata, services, interoperability, data sharing) based on a common setting,**
 - **plan tangible and usable INSPIRE deliverables for eReporting,**
 - **monitor progress on INSPIRE implementation in general and for the reporting use case in specific**
- promote the reuse of the INSPIRE infrastructure for reporting purposes.

Status of the list

Further work on the initial list

- Corrections
- Added prioritization criteria
 - **Main: CDF; Timing**
 - **Secondary: REFIT; Reference; EU and UN SDG relevance; support by policy unit**
- Candidate score based on criteria

Priority Criteria								Score			
CDF	Timing		REFIT			Environmental Reference data (see Core objects)	EU SDG relevance	UN SDG relevance	ENV POLICY SUPPORT	Core	Extra
EIONET CDF 2016	D1. Frequency of reporting	D3. Next deadline for reporting	H. Relevance	I3. Timetable	I5. Status	Does the reporting obligation contain reference data?	Target area and indicator	Target area and indicator		CDF Timing REFIT Support	Reference SDG

Extensions to the list

- Tab with reference objects
- Tab with a spatial data set view
 - **Overview of spatial data sets and their INSPIRE mapping**
 - **Added: As Is; maturity level; MS readiness; recommendations**
 - **Allowing to filter based on spatial data sets**

Assessment of status quo	Identification of maturity levels	Member State readiness	Recommendations
Current INSPIRE compatibility of reporting	basic essential premium	not available but planned available as is available with interop	

3-step action plan as follow-up

1. MS action: Implement the priority data sets (as-is) following the priority roadmap
2. Policy Unit action: Assess existing reporting obligations, optimize where possible.
 - **Analyse 'As Is'** (incl. information requirements for reporting), **assess INSPIRE maturity, make recommendations**
 - **Implement recommendations in reporting flow**
 - **MS implementation of updated reporting flow**
3. EEA action: support eReporting flow and make EU-level data interoperable and accessible for supported data flows (CDF)
