Description			
Where can I find information on whether an INSPIRE code list can be extended (for a Member State or thematic domain)?			

History

#1 - 09 Dec 2015 11:42 am - Michael Lutz

Proposed answer:

Each code list in the central INSPIRE registry has an attribute describing its extensibility, e.g. the code list

<http://inspire.ec.europa.eu/codelist/MediaValue/>

/system/rich/rich_files/rich_files/000/000/415/original/Extensibility.jpg

The extensibility can take one of the following values:

- [Not extensible](#): The code list cannot be extended, i.e. its allowed values comprise only the values specified in this register.
- [Extensible with narrower values](#): The code list can only be extended with narrower values, i.e. its allowed values comprise the values specified in this register and narrower values defined by data providers.
- [Extensible with values at any level](#): The code list can be extended with additional values at any level, i.e. its allowed values comprise the values specified in this register and additional values at any level defined by data providers.
- [Empty code list](#): No values are specified for this code list in this register, i.e. its allowed values comprise any values defined by data providers.
