

MIG-T - Task #2707

Analysis of access control to INSPIRE services

27 Feb 2016 11:49 am - Michael Lutz

Status:	Work in progress	Start date:	27 Feb 2016
Priority:	Normal	Due date:	
Assignee:	Robin S. Smith	% Done:	0%
Category:		Estimated time:	0.00 hour
Proposed change or action:			
Description			
Placeholder for discussions around the analysis of access control to INSPIRE services currently carried out by PwC for the ARE3NA ISA action.			

History

#1 - 11 Mar 2016 10:41 am - Robin S. Smith

- File *OriginalFiles.zip* added
- File *20160122-All-NS-Merged.zip* added
- File *20160122-All-NS-Merged&Translated.zip* added

The MIG-T has requested some details from the analysis. The background to this work is already published on the ISA Programme's JoinUp platform, including an [overview of all the work](#) so far and a [description of the approach](#) to analyse the INSPIRE Geoportal's metadata.

Three zip files are attached above:

- "Original files" coming from JRC's analysis tool that provides separate extracts for Discovery, View, Transformation and Download services
- "20160122-All-NS-Merged" that provides a merged dataset of these services
- "20160122-All-NS-Merged&Translated" which is the same as the above but with some additional work on translations of licences that ARE3NA is also exploring.

If you have any feedback on these datasets please provide it in this issue tracker. If you require any clarification feel free to contact us.

#2 - 06 Apr 2016 03:16 pm - Robin S. Smith

We will soon close this issue but would be interested to hear if you had any interesting discussions with your organisations relating to this dataset.

Please provide any comments here to this issue or feel free to contact me by email
