Description

Hello together,

the INSPIRE CSW Interface is down since some days -

Example POST:

```
http://www.opengis.net/cat/csw/2.0.2" xmlns:ogc="http://www.opengis.net/ogc" xmlns:apiso="http://www.opengis.net/cat/csw/apiso/1.0" xmlns:gml="http://www.opengis.net/gml" maxRecords="10" startPosition="1" outputSchema="http://www.isotc211.org/2005/gmd" resultType="results">fullTypedataset
```

to url:

<http://inspire-geoportal.ec.europa.eu/GeoportalProxyWebServices/resources/OGCCSW202>

Thanx in advance and best regards from Germany,

Armin

- Status changed from New to Feedback
- Assignee changed from Angelo Quaglia to Daniele Francioli

Dear Armin,

Thank you for your feedback. We tested your example request and it worked fine. We just added to the POST request the header "Accept: application/xml" and "Content-Type: application/xml".

You can see the request below:

```
/system/rich/rich_files/rich_files/000/001/552/original/Capture.JPG
```

Let us know if you can perform the request successfully.

Best regards,

Daniele

- Status changed from Feedback to Closed

hi daniele,

the solution was easy: - you switched to https only a few days ago. we altered the urls from http to https and the client works again ;-).

best regards from germany,

armin
